BIOINFORMATICS: FROM ALGORITHMS TO APPLICATIONS

July 16–19, 2018 — Saint Petersburg, Russia

We welcome you to participate in the conference "Bioinformatics: from Algorithms to Applications" (BiATA) that will be held on July 16–19, 2018 in St. Petersburg. The conference is organized by the Center for Algorithmic Biotechnology at the St. Petersburg State University,

Modern life science studies involve both biological and computational methods. Breakthrough results in these fields can only be achieved by tight communication and knowledge exchange between the two sides.

The ultimate goal of the conference is to bring together bioinformaticians and biologists to share experience in development and practical application of bioinformatics algorithms.

Topics

Sequencing technologies • Computational genomics • Molecular sequence analysis
Genome assembly • Transcriptomics • Metagenomics • Immunogenomics

KEYNOTE SPEAKERS

GENE MYERS
Ph.D., Managing Director, Max-Planck Institute for Molecular Cell Biology and Genetics

MIKHAIL S. GELFAND
D. Sc. and Ph.D., Member of Academia Europaea, Deputy Director of Institute for Information Transmission Problems

RICHARD DURBIN
Ph.D., Senior Group Leader at the Wellcome Trust Sanger Institute, Honorary Professor at University of Cambridge

ROB KNIGHT
Ph.D., Professor at the University of California, San Diego, Co-founder of the Earth Microbiome Project

AMI BHATT
Ph.D., Assistant Professor of Medicine & Genetics, Stanford University

LUDMILA CHISTOSERDOVA
Ph.D., Senior Scientist, Department of Chemical Engineering, University of Washington
